

MARCHETTO SRL

Who we are

A solid business in the metal buildings and industrial logistics sectors for more than 30 years, with an integrated range of products and services focused on structural and architectural design, manufacturing workshop, turnkey works assembly for residential/industrial use, installations and set up.

We build solutions

- Because we research constantly for our clients the best solutions, pursue efficiency and comply with the security codes.
- Because we combine mechanical durability care and architectural taste expressed in classical and modern forms.
- Because our executive method is based on self-sufficiency: we design and manufacture internally; in the end we assemble on site.
- Because we are a reliable general contractor in major projects nationally and abroad.
- Because we return finished and complete works in line with expectations.

Organized 360°

We have in-house departments that organize their working functions in synergy:

The **technical department** specialized in structural design, details design, materials retrieval (finished, semifinished and section bars), executive activities organization and control (in workshop) and on site assembly.

The **workshop** specialized in the metal components manufacturing by cutting, drilling, modeling, welding, folding and pre-assembly.

The **assembly team** that completes works with installation and set up by running the correct method and testing results.

Our 360° organization allows us to design, build and pre-assemble each component, control the whole production process, delete special interventions and restrict activities in construction sites to assembly and final inspection. With an actual saving of time and costs and a significant gain in terms of personal safety.

Products and Services

Industrial logistics

The logistics evolving and the high levels of competition on markets push many companies to seek efficient solutions to manage better the flows of raw materials and products, and make better use of storage spaces. The integrated services of Marchetto Srl allow to improve the activities of storage and handling of materials, optimizing flexibility, production capacity and lifetime of industrial plants.

- Shelving: for manual loading, pallet shelving, cantilever, gravity and automated warehouses
- Mezzanine floors and warehouses staircases
- Security platforms and overhead doors for loading bays
- Doors, sectional doors, fire shutters and industrial doors

Steel structures

Marchetto company designs and builds structures in structural steel, stainless steel and aluminum for all your needs, always ensuring the right balance between strength, mechanical strength, quality of materials, safety, attention to costs and architectural taste.

- External stairs, fire and security, railings, stairs and furnitures
- Shelters, fixed covers, furniture covers, walkways, tunnels

- Grid supporting floors
- Special structures and seismic structures
- Prefabricated buildings and several plans buildings (industrial and civil)
- Roofs of steel, aluminum, copper, zinc, titanium, brick and tin

Cladding and facades

Outer coverings are not only aesthetic complements, but they also are a valid protection from harmful weather, fires and water infiltration, a barrier to noise and thermal insulation. We offer customized solutions and a degree of care during assembly that makes our coatings valuable, functional and durable.

- Coating of metal, wood and composite materials
- Acoustic and fire coatings
- False ceilings made of metal, plasterboard and mineral fibers
- Continuous facades, structural facades, semi-structural facades (made of metal and glass)
- Internal and external doors and windows made of aluminium, steel (cold profile, thermal cutting) and wood
- Fire doors
- Pocket doors
- Cleaning interventions and facades' restorations

Constructions and finishing

In the construction industry there are not simple interventions: every civil and industrial structure is unique, and each intervention requires special skills and should be performed with skill and safety. For this reason Marchetto Srl candidates itself for building works, finishing and maintenance for all types of buildings, public or private.

- Civil and industrial restorations
- Internal and decor stairs
- Interior and exterior walls
- Floating and raised floors
- Ceilings, decorations and finishing
- Dry technologies and plaster works
- Painting
- Insulation and acoustic comfort
- Certifications and fire compartments
- Technical installations, fire protections, safety installations

Certifications

Marchetto Srl is certified: ISO 9001:2008 and ISO 3834-2:2006.

It is attested SOA OS 6 for Cl. III and OS7 Cl. OS18 II Cl. III.

This is evidenced by the Central Technical Service of CS Public Works Center Transformation which according to DM January 14, 2008 "Technical Standards for Construction" (certificate of complaint no. 1684/11).

Where to find us

We are based in Padua – Caselle di Selvazzano, 16, Meucci street.

We are also on-line at marchettocarlo.com with our integrated services and our history case.
